SUMMARY

Backend-driven Computer Science student specializing in building scalable APIs, server-side applications, and database-efficient systems using Node.js, Express.js, MongoDB, and MySQL. Experienced in integrating frontend features using React and Next.js when needed, with a strong focus on backend architecture and performance optimization.

EDUCATION

B.Tech in Computer Science and Engineering

SRM Institute of Science and Technology

Aug 2023 - May 2027 Chennai, Tamil Nadu

GPA: 8.87 (Till 4th sem)

Relevant Skills:

- Data Structures & Algorithms
- Web Development
- DBMS
- Operating Systems

EXPERIENCE

Web Development Intern

Cognifyz Technologies

Jul 2025 - Aug 2025 Remote

Web Development Intern

- Integrated and optimized backend services using Node.js and Express.js, improving task completion speed by 30%, and built supporting frontend features with React.
- Delivered 5+ backend-driven features in Agile sprints—focusing on API design, database operations, and performance—while maintaining a 95% code quality score.

Community Connect Volunteer

Sandeshkhali Maa Saroda Women & Rural Welfare Society

Jun - Jul 2025

West Bengal

Volunteer

- Conducted 40+ hours of digital literacy workshops for rural women, covering MS Word, Excel, Gmail, and safe internet use.
- Created bilingual digital guides, flowcharts, and step-by-step tutorials to improve accessibility and confidence.
- Enabled 50+ participants to independently access government portals, draft resumes, and manage daily tasks digitally.
- Strengthened facilitation, documentation, and teamwork skills through grassroots technology-driven education.

Certifications

- Oracle Cloud Infrastructure (OCI) 2025 Certified Foundations Associate – Oracle University
- Generative AI Foundations – Google Cloud / AWS (APIs, cloud AI services)
- Networking Basics – Cisco Networking Academy

SKILLS

Languages: C++ JavaScript, Python.

Backend: Node.js, Express.js, REST APIs, Next.js API Routes, MongoDB, MySQL, PostgreSQL, JWT, API Design, Server-Side Logic.

Front End: React, Next.js, Tailwind CSS, Responsive UI.

Tools & Platforms: Git, GitHub, Vercel, Firebase, Netlify, AWS (Basic), Jupyter.

PROJECTS

Track-It

Academic Productivity Platform
Aug 2025

- Developed an academic management system integrating attendance, placements, resumes, and notices using Next.js and modern React components.
- Implemented Next.js embedded API routes with a MongoDB backend, enabling fast, secure CRUD operations and improving data handling efficiency.
- Developed efficient MongoDB schema models and optimized API routes, improving backend response time and data handling.
- Implemented a fully responsive UI using React, JavaScript, and Tailwind CSS, ensuring seamless usability across all devices.
- Tech Stack: Next.js, React.js, JavaScript, MongoDB, Next.js API Routes, Tailwind CSS

File Manager API

Backend Development
Jan 2025

- Engineered a RESTful backend using Node.js, Express.js, MySQL, and Multer to support file upload, download, listing, and deletion.
- Designed file metadata persistence and disk-based storage with clean CRUD APIs and health checks.
- Implemented scalable API architecture with Docker-based local setup; planned extensions include JWT security, Redis caching, and pagination.

INTERESTS

Achievements

- Solved 65+ DSA problems on LeetCode, strengthening foundations in arrays, strings, and dynamic programming.
- Participated in technical workshops on AI, cloud computing, and software engineering.
- Attended hackathons including HackRx 6.0, collaborating in teams to design real-world applications.
- Built multiple backend projects strengthening concepts in APIs, database management, and server-side logic.
